CAREER SUMMARY

Computer Science graduate (Software Engineering & Information Systems) working as a **UX/UI designer and full-stack developer**. I turn stressful everyday tasks into clear, friendly interfaces: I map users and flows, design high-fidelity screens and **interactive prototypes in Figma**, then build them with **React Native and Next.js** on a **Node.js, Express and MongoDB** back end, in Scrum teams and on client projects. Open to UX/UI, Product Designer and Full-Stack Developer roles.

WORK EXPERIENCE

RedStart Tunisie — startup incubator

Tunis, Tunisia

· UX/UI Designer & Full-Stack Developer — Final-year project (solo) — Mar 2026 – Sep 2026

Glutenia · mobile app for a gluten-free lifestyle · Read the case study →

- Designed the complete mobile experience in **Figma** — user flows, high-fidelity screens and prototypes — for **3 user roles**: customers, food professionals and admins.
- Designed a "barcode first, AI second" **smart scan flow** with results in **4 clear states** (no danger, gluten detected, caution, unreadable) that explain each flagged ingredient.
- Designed a gluten-free place map, an **XP and badge system** and the mascot *Glutitan* (concept, name and story).
- Developed the **full stack** alone: **React Native + Expo (TypeScript)** app, **Node.js, Express and MongoDB** REST API, **JWT role-based access** and **AI label analysis** (Gemini, Groq), delivered over **3 Scrum sprints**.

Optima Junior Entreprise

Tunis, Tunisia

· UX/UI Designer — Project team (Pôle Projet) — 2025

L'Africaine de Production Artistique · children's book publisher · editionapa.tn (live) · Read the case study →

- Designed the **full website in Figma**: public pages, an online shop with filters by category, language, reading level and author, product pages and a cash-on-delivery order form. Handed off to a developer; now live.
- Designed the **admin back-office (20+ screens)**: dashboard and management of articles, orders, news and filters, with add, edit and delete-confirmation states so staff never lose content by accident.
- Created a playful, child-friendly **visual identity** (purple and gold, Poppins, hand-drawn details).

· Marketing Team — Web Design, Community & Visuals (Pôle Marketing) — 2025 – 2026

Value · consulting, AI and data company · value.com.tn (live) · Read the case study →

- **Led the website redesign mockups (maquettage)**: split the pages across the team, reviewed each one, **presented them to the client** and relayed their feedback.
- Designed the **homepage and careers page**: track-record figures beside the intro, a 5-solution carousel and an on-page application form.
- Managed the organisation's **X account** and designed post and campaign visuals in **Illustrator and Photoshop**.

PROJECTS

Perfumty — UI/UX Designer & Developer

Mar 2025

Academic project · team of 2 · customizable perfume e-commerce site

Tools: Figma, React, Next.js, TypeScript, Tailwind CSS, React-Hook-Form, Zod, Node.js, JWT

- Designed the UI/UX in Figma, including a **dynamic product configurator** to blend scents and preview them in **real time**.
- Co-developed the app in **Next.js and TypeScript** with React-Hook-Form + Zod validation and **JWT auth** on Node.js.

EDUCATION

Licence en Informatique — GLSI (Software Engineering & Information Systems)

2026

Faculté des Sciences de Tunis, Université de Tunis El Manar · *Mention Très Bien*

VOLUNTEERING & EVENTS

Event Staff — Femmes Entrepreneurs de Tunisie 2026, IP Days, JetXpo

2025 – 2026

Radisson Blu and Cité de la Culture, Tunis · guided attendees and speakers, coordinated on-site logistics

SKILLS

UX & UI	User flows, information architecture, wireframes and mockups (maquettage), high-fidelity UI, interactive prototyping, mobile and responsive web design, style guides, UI states, design hand-off
Design tools	Figma, Adobe Photoshop, Adobe Illustrator, Canva
Front-end	React Native, Expo, React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
Back-end	Node.js, Express, MongoDB, REST APIs, JWT authentication, SQL, AI APIs (Gemini, Groq)
Tools & methods	Git, GitHub, Postman, Remotion · Scrum / Agile · teamwork, client and developer collaboration
Languages	Arabic (native) · French (fluent) · English (advanced, C1)
