Manel Ayari

Bardo, Tunis, Tunisia

UX/UI Designer | I design friendly apps and websites, then build them.

manelayari04@gmail.com | +216 90 174 469 | Portfolio: manelayari.vercel.app

See my work → manelayari.vercel.app — two full case studies with Figma screens, prototypes and videos of the real app:
Glutenia (mobile app, designed and built) · L'Africaine de Prod Artistique (website, live)

Profile

UX/UI designer with a Computer Science degree (*Mention Très Bien*) who turns stressful everyday tasks into clear, friendly interfaces. I map users and flows, design high-fidelity screens and prototypes in Figma, and build what I design. Looking for a UX/UI, UI or Product Designer role.

Selected projects

Glutenia — UX/UI Designer & Developer (solo)

Mar – Sep 2026

Final-year project at RedStart Tunisie (startup incubator) · mobile app for a gluten-free lifestyle · Read the case study →

- Designed the complete mobile experience in Figma — user flows, high-fidelity screens and interactive prototypes — for three user roles: customers, food professionals and administrators.
- Designed a "barcode first, AI second" scan flow with results in four clear states (no danger, gluten detected, caution, unreadable) that explain each flagged ingredient.
- Designed a map filtered by place type with "certified gluten-free" badges, an XP and badge system, and the mascot *Glutitan* (concept, name and story) to keep users motivated.
- Built it in React Native and Expo (TypeScript) with a Node.js, Express and MongoDB API, JWT role-based access and AI label analysis (Gemini, Groq), refining the Figma designs into the shipped app over 3 Scrum sprints.

L'Africaine de Production Artistique — UX/UI Designer

2025

Client project with Optima Junior Entreprise · children's book publisher · editionapa.tn (live) · Read the case study →

- Designed the full website in Figma: public pages, an online shop with filters by category, language, reading level and author, product pages and a cash-on-delivery order form. Designs handed off and now live.
- Designed the admin back-office (20+ screens): dashboard and management of articles, orders, news and filters, with dedicated add, edit and delete-confirmation states so staff never lose content by accident.
- Built a playful, child-friendly visual identity (purple and gold, Poppins, hand-drawn details) while keeping prices, filters and forms simple for the parents who buy.

Experience

Marketing Team (Community & Visuals) · Project Team

2025 – 2026

Optima Junior Entreprise, Tunis · Pôle Marketing and Pôle Projet

- Managed the organisation's X account as community manager and designed the images for posts and campaigns in Adobe Illustrator and Photoshop.
- Designed the UX/UI of the L'Africaine website in the project team, working with a developer to deliver it.

Event Staff — Femmes Entrepreneurs de Tunisie 2026, IP Days, JetXpo

2025 – 2026

Radisson Blu and Cité de la Culture, Tunis · guided attendees and speakers, coordinated on-site logistics

Education

Licence en Informatique — GLSI (Software Engineering & Information Systems)

2026

Faculté des Sciences de Tunis, Université de Tunis El Manar · *Mention Très Bien*

Baccalauréat — Sciences Expérimentales

2022

Lycée Khaznadar, Bardo
